NanoSet™ Protector

POLISHING & MAINTENANCE

NewLook's NanoSet™ Protector is a revolutionary penetrating sealer and finishing conditioner formulated to enhance and condition polished architectural and commercial concrete floors.

NanoSet Protector is applied during the polishing process and used as part with the NanoSet™ Polishing System. It introduces additional colloidal silica to the substrate, along with a thin, clear polymer layer that provides extra protection. It also brings out the color in integrally pigmented, stained or dyed concrete, creating a slight "wet look" that compliments exposed aggregate.

The polymer-based formula provides extra protection against accidental staining from spills. It is particularly useful against mild acids, such as might be encountered in environments where food is handled or served. For long term protection, it can be easily re-applied, helping you maintain a long-term relationship with your customers.

Features & Benefits:

- Enhances colored concrete floors
- Increases durability and stain resistance of concrete floors
- Increases slip resistance
- Ease of maintenance and cleaning
- Water based, environmentally friendly product

Sizes & Coverage:

- Available in 32 oz., 1 gallon, 5 gallon and 55 gallon containers
- Coverage is approximately 1,500 to 2,000 square feet per gallon.
Dilute 1 part NanoSet Protector™ concentrate with 1 part potable water.

Applications (exterior and interior):

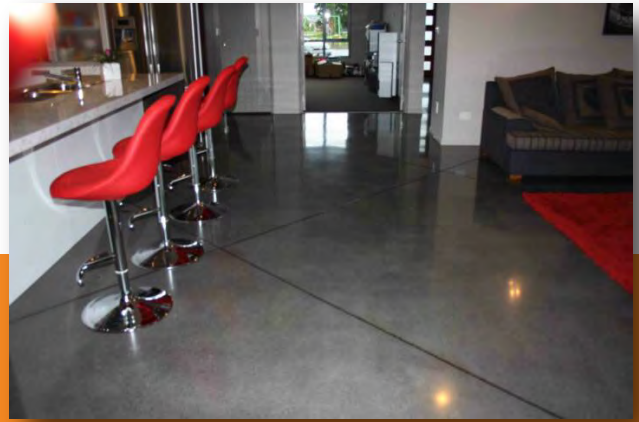

- Ideal for pool decks!
- Driveways
- Patios
- Walkways
- Convention Centers
- Sidewalks
- Theme parks
- Municipal property

Working Tips & Keys to Success:

- The surface should be completely clean and dry before application
- Apply a light mist from a pump sprayer
- Using a damp micro fiber or flat cotton pad applicator, spread NanoSet Protector™ in a thin filmcoating using a "figure 8" motion to reduce streaking and prevent puddling
- High speed burnishing using fiber pad (red or black) or hogs hair pad will further enhance the finished surface.
- Protector is intended for interior use and will not withstand UV exposure.
- Cure finished floor for 24 hours before allowing regular foot traffic

NanoSet™ Protector

POLISHING & MAINTENANCE

NanoSet™ Protector Technology

The NanoSet Polishing System utilizes a proprietary and green manufacturing process to leverage advanced, inert nano-technology to deliver sustainable and durable results. The concentrated dispersion of amorphous, nano-silica particles offer extensive chemical reaction-sites that penetrate deeply and start reacting quickly upon contact, forming calcium silica hydrate (CSH) and strengthening the concrete matrix and increasing its stain resistance.
